

NEW

DUAL CHECK VALVE

Felton's new dual check valve is a reliable backflow prevention device designed to fit seamlessly between a water outlet and hose. It consists of two independently acting check valves to prevent contamination of potable water sources by preventing backflow from non-potable sources. Featuring durable construction for reliable operation.

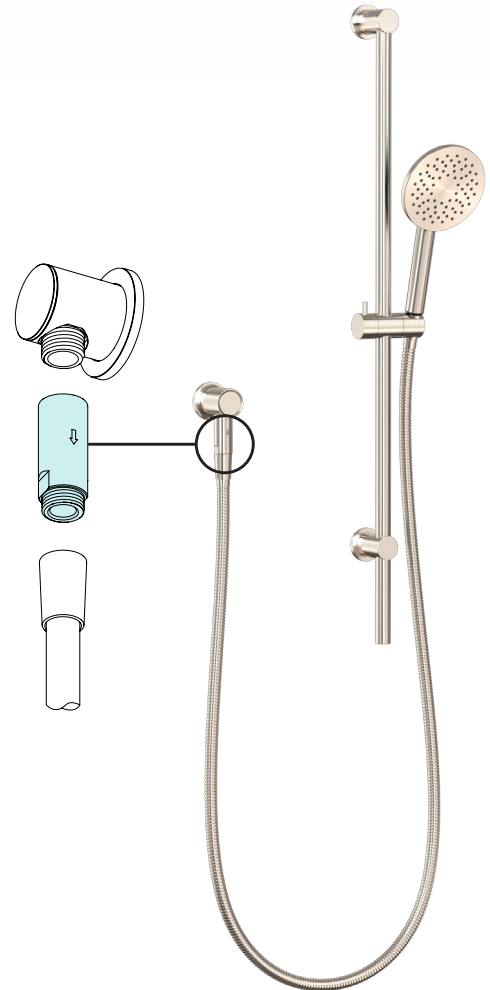

Features & benefits:

- Designed to fit between a shower outlet and hose
- 1/2" BSP connections
- Designed in NZ
- 5 year warranty

Available in chrome and PVD finishes:

		MAINS PRESSURE* WATERMARK
	CHROME	TP0498
	BLACK	TP0499
	BRUSHED NICKEL	TP0500
	BRUSHED GUNMETAL	TP0501
	BRUSHED GOLD	TP0502
	BRUSHED BRONZE	TP0503

*Mains pressure: Not recommended for low pressure installations

Chrome Hose Hook

Product code: CHH19 / CHH

Simply fit onto a 19mm (CHH19) or 25mm (CHH) diameter slide rail and attach the handpiece to the hook. This prevents the handpiece from dropping on the floor and contaminating potable water sources. A quick and simple solution to preventing backflow water contamination. Available in chrome only.
